1. Transmittal of the translation to the applicant.

The International Bureau transmits herewith a copy of the English translation made by the International Bureau of the international preliminary examination report established by the International Preliminary Examining Authority.

2. Transmittal of the copy of the translation to the elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following elected Offices requiring such translation:

CN, EP, KR

The following elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

US

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report.

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

2. Citations and explanations

Document 1: JP, 2002-207118, A (Nitto Denko Corp.), 26 July, 2002 (26.07.02)

The subject matters of claims 1-15 do not appear to involve an inventive step in view of document 1 cited in the ISR. In document 1 ([0006]), a constitution, in which a very small area made of a birefringent material is provided in a light-transmitting film to cause polarization scattering, is combined with a linear polarizer made of an absorbing dichroic material. In this case, the absorbing dichroic material in document 1 exists in a very small area, and both a polarizing film in which an absorbing dichroic material is provided in a light-transmitting film, and a polarization scattering sheet in which a very small area made of a birefringent material is provided in a light-transmitting film, are so well known that it is not necessary to refer to examples. Furthermore, judging from the above-mentioned principle, it is not excluded that the said dichroic material is provided in a light-transmitting film. So, a person skilled in the art could have easily conceived of providing the absorbing dichroic material described in document 1 in a light-transmitting film. All the effects described in the specification (page 34) can be predicted.
